

EZ PayPal Country Pricing

Let's face it. Things cost differently in different countries. Why would you sell your product the same price for all customers?

EZ PayPal Country Pricing is a Joomla plugin, using {ezpaypalcp}, that has some of the most popular capabilities that Easy Paypal gives you, but also allows you to set country specific pricing for your items.

Using EZ Paypal Country Pricing, you can set your Paypal buttons using bot configuration as well as dynamically set it in your content. EZ Paypal Country Pricing supports all the parameters that Easy Paypal supports, including subscription and recurring payments.

In addition, EZ Paypal Country Pricing allows you to set price based on the country your visitor is coming from. We use an IP to Country database to achieve this. The database is updated regularly.

Each purchase is valid for one domain. Depending on your installation of Joomla, you can choose either one of the following two options. IP to Country database is updated to Jun 19, 2009. EZ Paypal Country Pricing for Joomla 1.0x
EZ Paypal Country Pricing for Joomla 1.5

EZ Paypal Country Pricing is not free. If you want to download the latest version, there is a \$20 charge. Once we received your payment, we will email you the latest version.

```
{easypaypal itemname=HyBing - EZ Paypal Country Pricing,itemnumber=8,amount=20}
```

Starting with v1.2, EZ Paypal Country Pricing uses Joomla 1.5 as code base. And it is billed separately from Joomla 1.0x ones. There is a \$20 charge for Joomla 1.5 releases.

```
{easypaypal itemname=HyBing - EZ Paypal Country Pricing for Joomla 1.5,itemnumber=14,amount=20}
```
