

## Easy Paypal

There are many Paypal modules or bots available. Why choose HyBing's Easy Paypal?

Easy Paypal is a Joomla plugin, using {easypaypal} syntax, with following unique features:

- You can set the Paypal parameters using default Joomla bot configuration screen, as well as, setting the parameters dynamically in the content.
- Easy Paypal also support multiple Paypal buttons on the same page with different parameters.
- You can set the parameters for email address, dollar amount, currency, itemname, itemnumber, quantity, handling, shipping, shipping2, showquantity, no\_note, cn, button, return, cancel\_return, on0, os0, on1, os1 or a combination of the above.
- Easy Paypal supports all Paypal currencies and all major parameters. Easy Paypal also supports additional parameters to give your more flexibility.
- Easy Paypal supports regular payment, shopping cart, subscription and sea.
- Easy Paypal supports many subscription related parameters: (cmd\_type=subscription), Trial 1 amount, period, and period unit, (a1, p1, t1), Trial 2 amount, period, and period unit (a2, p2, t2), Regular amount, period, and period unit (a3, p3, t3), Recurring payments (src), Reattempt on failure (sra) and Recurring Times (srt).

Each purchase is valid for one domain. Depending on your installation of Joomla, you can choose either one of the following three options. Easy Paypal for Joomla 1.0x Easy Paypal for Joomla 1.5 Easy Paypal, version 1.0, is Free. If you want the latest updates and new features (last one being version 2.1.9), there is a \$10 charge.

{easypaypal itemname=HyBing - Easy Paypal for Joomla 1.0,itemnumber=5,amount=10} Starting with v2.2, Easy Paypal uses Joomla 1.5 as code base. And it is billed separately from Joomla 1.0x ones. There is a \$10 charge for Joomla 1.5 releases.
